CONTROLE 195[1]_EPAonly.pdf

Fyi, getting the book the other day and our conversation reminded me of this French article from the end of last year. I emailed the French just now to see if they ever issued the English version.

Subject: Superfund article in French magazine out

The article in the magazine for the French Nuclear Safety agency is out, in French. English version soon.
This was approved by Betsy prior to leaving.

Thanks Odile,

Don't worry about the delay. I love the sound effects of the turning pages. Will you have some extra copies of the magazine for Betsy, Dave, and Melissa?

Betsy, David, Melissa, our article is on pages 84-89 if you look at the version online. I made a pdf just of the cover and the EPA pages (see attached).

(See attached file: CONTROLE 195[1]_EPAonly.pdf)

Hi Stuart

Good news : your article has been published. Sorry, it's only now the french version. In few weeks, the english version could be published.

You can find it on ASN website

<http://www.asn.fr/index.php/S-informer/Publications/La-revue-Contrôle/Dossiers-de-Contrôle-2012/Contrôle-195-La-gestion-des-sites-et-sols-pollués-par-de-la-radioactivité>

There is films too on the website.

Next, we send you magazine at your office

Sorry to inform you too late

I hope you well

Thanks and happy christmas

Odile

Hi Odile,

I hope that everything is going well.

I was wondering if this article has been published yet.

Thanks,
Stuart

Hi Stuart

We don't know yet when it could be published . Perhaps in july or in september. This is not decided
Perhaps we have to publish something about fukushima in july.

When it's published, we send you the revue

Thanks

Odile

Hi Stuart ;

These pictures are perfect.

I like specially the humour of the local newspaper .

I think we will choose all this pictures to include at your publication

Thank's

Odile

(See attached file: tcrapic1.JPG)(See attached file: starmetdrums.jpg)(See attached file: starmet drums2.jpg)(See attached file: starmetdrums3.jpg)(See attached file: starmetfacilityaerial.jpeg)

take your pick... tcrapic1 is part of the 2008 EPA time critical removal action and this person was cleaning the contaminated machine oil coolant tank.

the next three pictures are of depleted uranium drums and other wastes that were being stored at the facility before the DEP removal action in 2006. the last photo is what it says...an aerial of the nmi site after we capped the old landfill and holding basin.

 Stuart Walker---03/25/2012 08:33:07 PM---If you have some pictures of your sites, the french would appreciate them. I would think a one sent

Hi Stuart,

It's well.

If it's possible, you can take an other example too : about contaminated residential area (by thorium ? the west lake landfill ?)

Thank's

Odile

Hi Odile,

Would you like two site case studies, like the last time? In which case I will try and get one radium residential and one depleted uranium example.

Stuart

Hi Stuart

thank you for your message.

I confirm to you that we like something similar to 2008 article.

For example we prefer radium residential , or depleted uranium area.

We don't want uranium mines, perhaps in 2013 with an other review and

I'm sure we will ask you something !

The focus of stakeholder involvement is a good idea too.

I think that regional staff has some good stories, and could be very interesting for us

thank's a lot for your help

Odile

Objet : Re: contribution of US EPA of the french Contrôle review "the areas contaminated by radioactive substances"

Hi Odile,

I had provided to Olivier in 2008 an article, which I think was for "Contrôle". Please see attached pdf which included case study of Hanford and Rocky Flats.

(See attached file: FrenchD&D2008Paper_5pg.pdf)

Would you like something similar to this, but possibly with different site examples for case studies? If you are interested in case studies, are there any site types that you are particularly interested in (e.g., radium residential, uranium mines, depleted uranium, etc)? Would you rather have a write-up of nuclear legacy sites, but more focused stakeholder involvement?

I think my management would still be supportive of EPA providing an article. I will then need to talk to regional staff to see who has a good story for a write-up.

Thank you,
Stuart

Subject: contribution of US EPA of the french Contrôle review "the areas contaminated by radioactive substances"

Hi Stuart,

You can find a message of Lydie Evrard, Director of Research reactors

and nuclear waste Department, she would like to open the pages of our review to a contribution of US EPA.
I hope you will agree and I hope to see you in June
Odile

Since 1978, the French Safety Authority (ASN) has published a two-monthly magazine ("Contrôle") of information on the safety of nuclear installations.

Contrôle review is composed in particular of a file devoted to a specific topic concerning nuclear safety or radiation protection. In addition to the standpoint of the ASN on this topic, Contrôle opens its columns with the most various opinions. The publication of these points of view contributes to found the conditions of a wide-ranging debate and supports the emergence of pluralist information; more taking into account the concerns of the opinion. Contrôle is a free publication diffused on the basis of voluntary subscription and is also available on ASN Internet website (www.asn.fr). Contrôle review is published with nearly 10.000 specimens.

In France, Contrôle review is addressed to the national and local elected officials, the media, the journalists, the members of local commissions, non governmental organizations, the industrials and the administrations concerned, the private individuals on request. Abroad, Contrôle is addressed in particular to the foreign nuclear safety Authorities.

ASN will publish in July 2012 the number 195 of Contrôle which will relate to "the areas contaminated by radioactive substances". This publication will be issued after publication of the "methodological guidelines for the management of areas potentially contaminated by radioactive substances" in December 2011 and will be presented to the media by ASN.

This publication on "the areas contaminated by radioactive substances" is an opportunity to present :

- The issues and national policy of management and clean-up of the areas contaminated by radioactive substances;
- The action of the different stakeholders in this approach;
- Practical examples;
- The implication of the stakeholders and their point of view on the French approach;
- International experience.

Within the framework of this publication, ASN will contact in particular industrials, foreign safety authorities (USA, Belgium, Canada), French administrations, members of Parliament, its technical support organization (IRSN), and non-governmental organizations.

We would thus like to open the pages of our review to a contribution of US EPA to present the regulatory approach in the US and in particular your policy regarding management of contaminated areas and your program "superfund".

If this proposal caused your adhesion, we would wish to obtain your agreement on this principle in order to have if possible your contribution (approximately 2500 to 3000 words) for March 15, 2012. This contribution could be written in English and will be translated in

French by our services.
Yours sincerely,

Lydie EVRARD
